Health and Safety

Health and Safety

At Beshay Steel, our employees are our most valuable asset. Therefore we operate a very strict health and safety policy, which have enabled us to **decrease** injury rates by **20% in 2007**.

We are aiming to achieve a further 40% injury reduction by the end of 2010.

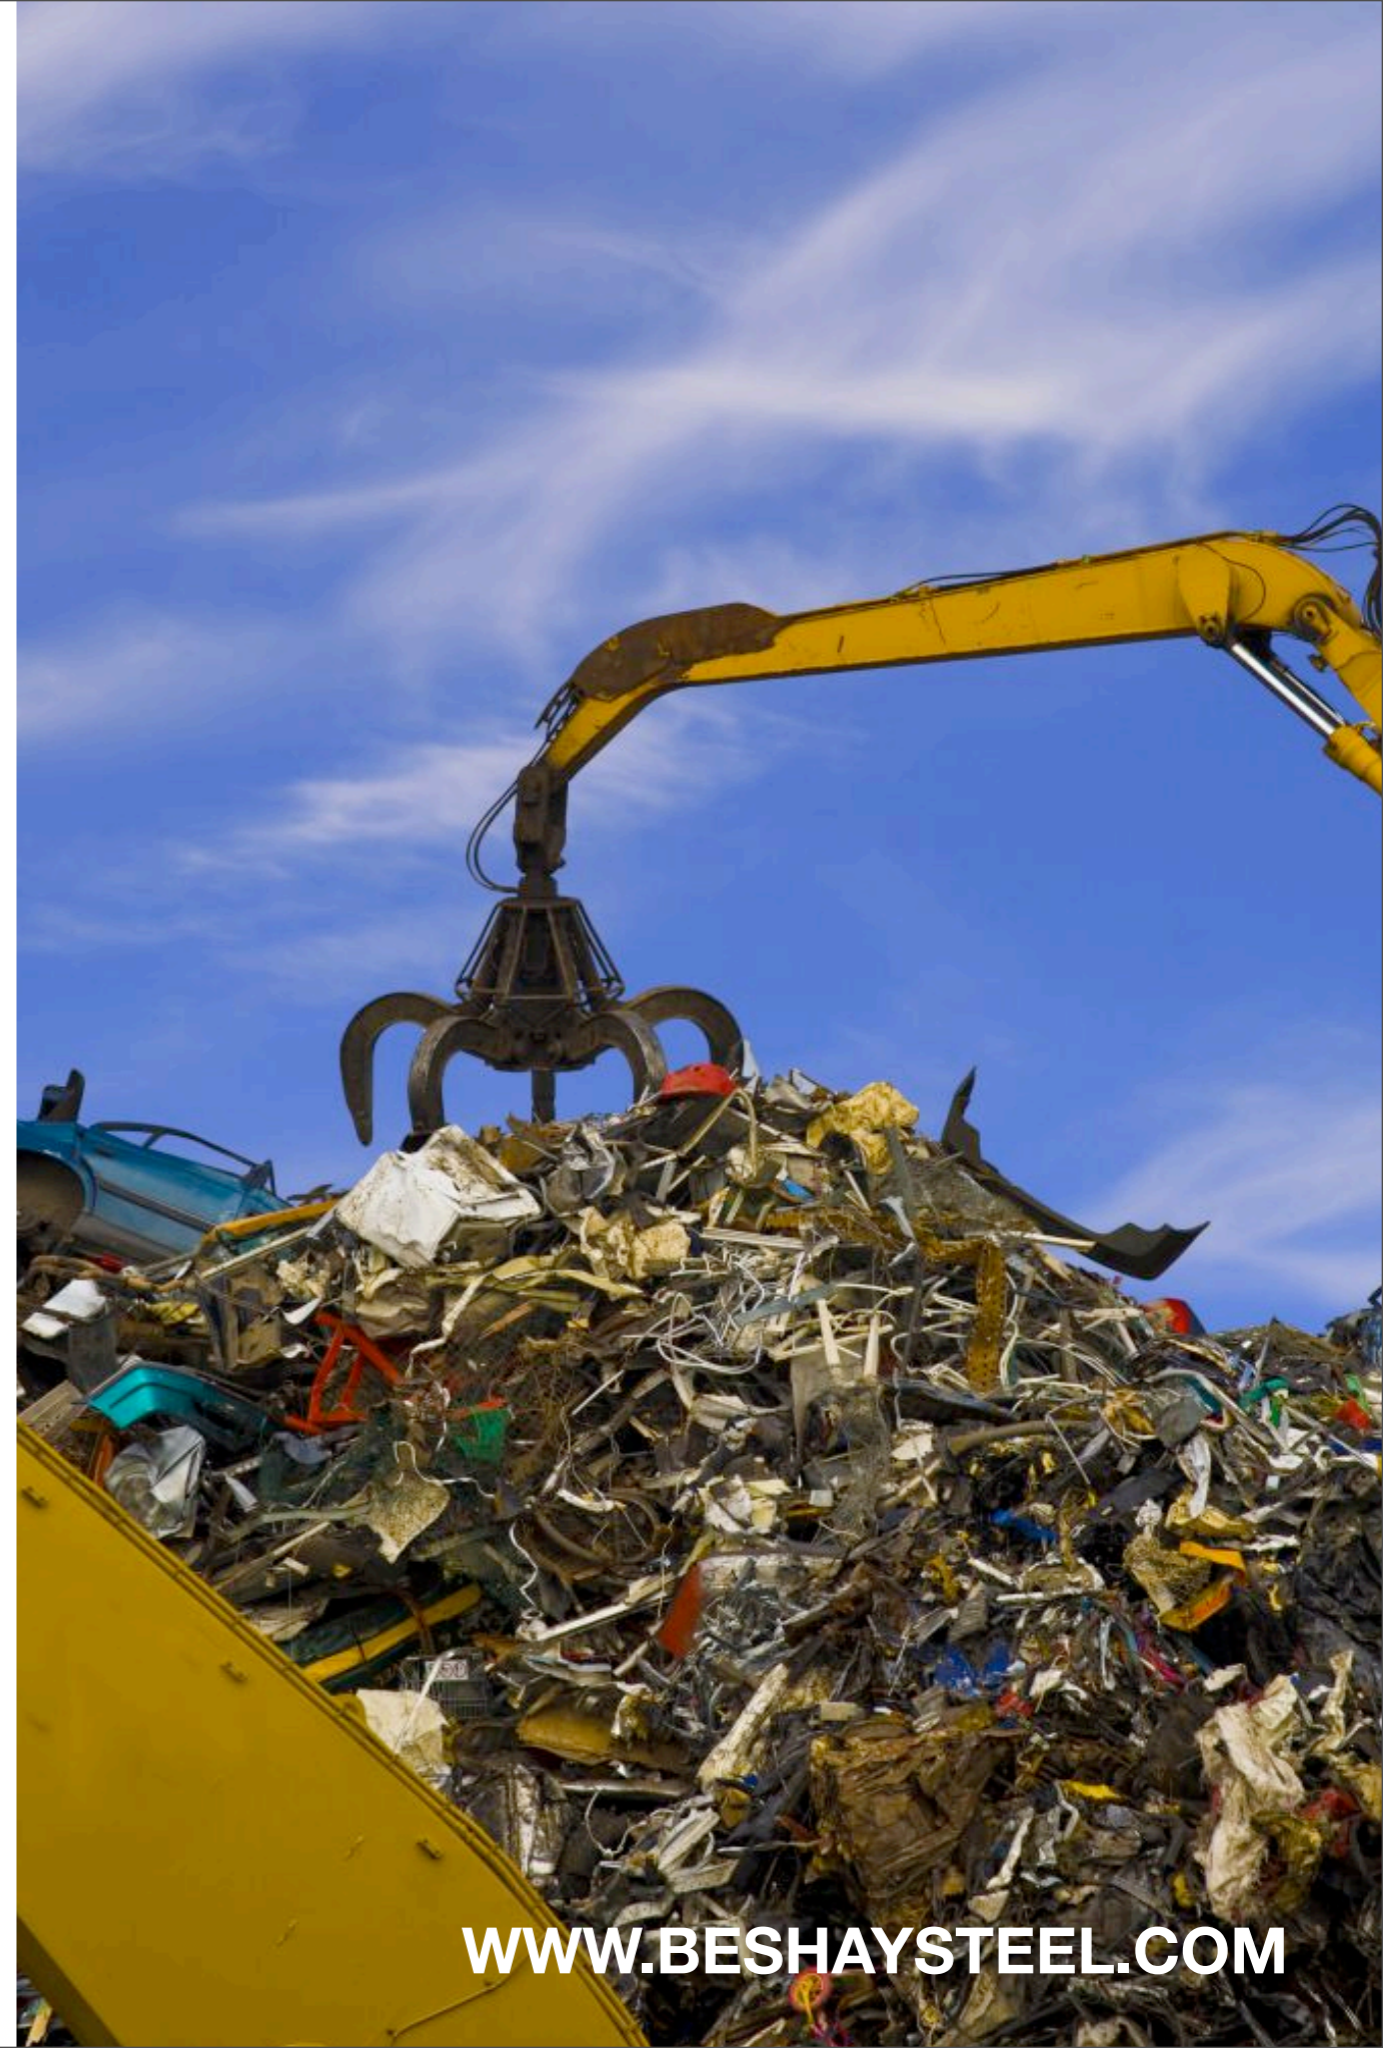

The Environment

Recycling

At Beshay Steel **4600 Tons** of steel scrap are recycled **everyday**.

Recycling

In 2009, **9200 Tons** of steel scrap will be recycled **daily**.

Emissions

Did you know that Beshay Steel operates a **2,500,000 Nm³/h** de-dusting system at its current steel melt shop to minimize our emissions.

This de-dusting system is **38% over** the required suction capacity

We care to make a difference.

Energy

Energy

The new Beshay Steel head quarters will be fully operated with solar power.

This is another contribution to saving energy resources in addition to the continuous upgrading and improvement of our equipment to reach better efficiencies and save our planet.
